

True Horizon is a sustainability consultancy with a mission to support businesses in balancing purpose and profit. We recognise the importance of leading by example and are, therefore, committed to minimising our own environmental footprint across all areas of our operations that we either control or influence.

True Horizon is committed to:

- ❖ Reducing consumption
- ❖ Compliance with all applicable local, regional and national environmental legislation
- ❖ Pollution prevention
- ❖ Continual improvement and reduction of our environmental impact
- ❖ Supporting the local community

### Environment

In support of these commitments, we track and monitor our key environmental aspects and set targets to minimise their impact, including:

- The procurement of renewable electricity & offset gas
- Energy reduction
- Enhanced waste management in line with the waste hierarchy
- Reduction in resource consumption, including paper, plastic and other office stationery
- Reduction in travel emissions

### Social

We believe that businesses should adopt a triple bottom line strategy and so in addition to our environmental commitments, our social priorities include:

- Community support in the form of monthly donations and volunteering
- Prioritising spend with local suppliers and businesses where possible

Nancy Hyne, Director
