

True Horizon is a sustainability consultancy with a mission to support businesses in balancing purpose and profit. As a certified B Corporation, I committed to continual improvement and working to ensure that all areas of my operations that I either control or influence have a positive material impact on the environment and society.

True Horizon is committed to:

- ❖ Reducing consumption
- ❖ Compliance with all applicable local, regional and national environmental legislation
- ❖ Pollution prevention
- ❖ Continual improvement and reduction of my environmental impact
- ❖ Supporting the local community
- ❖ Diversity and inclusion

### Environment

In support of these commitments, I track and monitor my key environmental aspects and set targets to minimise their impact, including:

- The procurement of renewable electricity & offset gas
- Energy reduction
- Enhanced waste management in line with the waste hierarchy
- Reduction in resource consumption, including paper, plastic and other office stationery
- Reduction in travel emissions

### Social

I believe that businesses should adopt a triple bottom line strategy and so in addition to my environmental commitments, our social priorities include:

- Community support in the form of monthly donations, volunteering and education.
- Prioritising spend with local suppliers and businesses where possible

This document is reviewed annually and updated as appropriate.

Nancy Hyne, Director
